

# IRF WORLD ROAD MEETING 2017

/ 14-17 NOVEMBER / DELHI / INDIA /

# CROSS / ROADS

LINKING MOBILITY SOLUTIONS

## SPECIAL SESSION

**World Bank**

**Road Safety:**

**Critical issues in implementation to meet the SDG targets**

**16<sup>th</sup> November – 12:00-13:30**

### DESCRIPTION:

Road crashes are the number one killer of young people worldwide and 90% occur in developing countries. India itself suffers as one of the leading countries in terms of road fatality in the region.

The session goal is to Highlight major international road safety issues and barriers to implementation, and offer solutions; highlight World Bank road safety projects (global and regional); and discuss road safety in India and the South Asia region more broadly. It will discuss the concept of Safe System from the World Bank perspective of implementation, and show how existing projects and solutions are being implemented through innovative uses of leveraging resources both through the development banks and country governments. It will further discuss how partners are moving towards innovative solutions, for example in areas such as vehicle safety and inspection which is becoming increasingly important in the face of rapid motorization.

Finally, regional trends will be explored including utilizing projects on inclusive infrastructure, crash database management and demonstration corridors to show how a sensible approach to capacity building can achieve short term results while setting up longer terms gains for road safety.

This session will benefit both the policymaker and the road safety practitioner in exploring how we can more quickly accelerate progress the meet the SDG target for road safety.

**Session Goals:** to highlight (i) global trends in road safety; (ii) global lessons applied in WB projects in India; (iii) road safety challenges in BBIN countries; and (iv) the importance of vehicle inspections for safer roads.

**Format:** Panel Style with Presentations and Moderator
